

Chemical & Metallurgical Engineering

Volume XXXIX

From January to December

1932

Published monthly by
McGRAW-HILL PUBLISHING COMPANY, INC.
NEW YORK

JAMES A. LEE
Managing Editor
HENRY M. BATTERS
Market Editor
THEODORE R. OLIVE
Assistant Editor

CHEMICAL & METALLURGICAL ENGINEERING

R. S. MCBRIDE
Washington
PAUL D. V. MANNING
San Francisco
Assistant Editors
M. A. WILLIAMSON
Publishing Director

S. D. KIRKPATRICK, Editor

Chemical & Metallurgical Engineering is the successor to Metallurgical & Chemical Engineering, which, in turn, was a consolidation of Electrochemical & Metallurgical Industry and Iron & Steel Magazine. The magazine was originally founded as Electrochemical Industry.

McGraw-Hill Publishing Company, Inc., New York City

Volume XXXIX January to December, 1932

GENERAL ALPHABETICAL INDEX

Pages	Ammonia:		
January	1 to 62	Disposing of ammonia liquor as a waste product. Moses & Mackey.	441
February	63 to 122	Dissociator (E. N.)	*287
March	123 to 182	Diversified heavy chemicals industry in Holland. E. Borelli	*126
April	183 to 246	Synthetic ammonia shows large decrease	46
May	247 to 306	Urea-ammonia liquor—new fertilizer material. Parker & Keenen	*540
June	307 to 366	Ammonium phosphate—Making strong phosphoric acid at Trail, B. C.	W. C. Weber
July	367 to 426	Asbestos (table)	*659
August	427 to 486	Asbestos cement piping	*517
September	487 to 546	Asphalt roofing preparing. J. B. Nealey	*86
October	547 to 606		
November	607 to 666		
December	667 to 726		

A	B
Abrasion resisted by anode coatings.	Bauxite—resources in Southwest. W. M. Weigel
Absorber, oxygen (E. N.)	Belts, conveyor, factors governing life of. C. F. Conner (P. N.)
Accounting. Questions for the accounting department (ed.)	Belt, spliceable rubber (E. N.)
Acetate—recovering volatile solvent in cellulose acetate process. Avery & Kress	Belt standard (E. N.)
Acetic acid equipment. D. F. Othmer	Benzol—Alcohol and benzol as motor fuels in world markets
Acids. Reducing hazards in acid drum use. T. P. Callahan	Beryllium metal and alloys
Advertising. Planned promotion for technical sales. R. S. McBride	Bichromate production
Air:	Binary cycle. P. W. Swain
Air lift nomograph. D. S. Davis (P. N.)	Blasting without explosives. F. H. Kneeland
Conditioning and drying in cable manufacturing. Wells & Wade	Bleaching powder made by new process. Caruzzi & Paoloni
Drying and air conditioning (B.)	Blue-print process (E. N.)
Factors that influence dryer performance. Arnold Weisselberg (Möller chart)	Boards sheathed with metal
Filtration methods discussed	Boilers, mercury (E. N.)
Humidity controller (E. N.)	Boiler installation for pulverized fuel
Alcohol:	Book Reviews:
Benzol and alcohol as motor fuels in world markets	American engineer looks at Russia. G. A. Burrell
Butyl alcohol	American gas practice. J. J. Morgan
Change needed in denaturing formulas (ed.)	American Institute of Mining and Metallurgical Engineers series
Freezing points in ternary alcohol mixtures. D. S. Davis (P. N.)	Analysis of fuel, gas, water, and lubricants. S. W. Parr
Industrial alcohol output curtailed	Analysis of leather and materials used in making it. Wilson & Merrill
Alkali:	Annual survey of American chemistry, ed. by C. J. West
Metals that resist alkali corrosion. J. L. Everhart	Arbeiten über Kälteleitung. H. C. Eckstein, A. Jacob and F. Alten
Price wars cut alkali profits (tables and charts)	Beryllium, its production and application
Prospects in the Southwest (ed.)	Book of metals. Donald Wilhelm
Alloys—Chem. & Met. data sheets for corrosion, heat and abrasion resistant metals and alloys	Chemical analysis of iron and steel. Lundell, Hoffman & Bright
Stainless alloys, in chemical construction. Wright & Luger	Chemical encyclopedia. C. T. Kingzett
Aluminum alloy, corrosion-resisting (S.)	Chemical patent index. E. C. Worden
American Chemical Society—New Orleans meeting	Chemische-technische untersuchungsmethoden. Lunge & Berl
American Gas Assn.—Atlantic City meeting	Chemistry of the monosaccharides and of the polysaccharides. Hans Prigheim
Convention	Colloid chemistry. J. J. Alexander
American Institute of Chemical Engineers (ed.)	Colloid chemistry, theoretical and applied. ed. by Jerome Alexander
Semi-annual meeting	Combustion
Washington meeting	Das buch der grossen chemiker. Gunther Burgre
American Society of Mechanical Engineers—Comparison of fusion-welding requirements for unfired pressure vessels (P. N.)	Der glycerin. Ernst Schlenker
Power exposition	Der Chemie-Ingenieur. Eucken & Jakob
American Welding Society—Buffalo convention	Die werkstoffe der chemischen apparate. H. Freytag
New York convention	Economics for engineers. Bowers & Rountree

C
Cake washing on continuous filters. G. W. O'Keefe
Canada may come to a bargaining tariff (ed.)
Elemente der Chemie-Ingenieur-Technik. Badger & McCabe
Engineering: a career—a culture
Examination of water. Mason & Buswell
Explosives. Arthur Marshall
Fixed nitrogen, ed. by H. A. Curtis
Flotation. A. M. Gaudin
Free energies of some organic compounds
Fünfzig Jahre metallgesellschaft. Walther Dabritz
General engineering handbook, ed. by C. E. O'Rourke
Handbuch der technischen elektrochemie. Victor Engelhardt
History of chemistry. Moore & Hall
History of the British chemical industry. Stephen Miall
Hoyer-Kreuter technological dictionary, ed. by A. Schlomann
Hydrogen ions. H. T. S. Britton
Ingenious Dr. Franklin, ed. by N. G. Goodman
International handbook of the byproduct coke industry. W. Glund
Kinetics of homogeneous gas reactions. Louis Kassel
Law of patents for chemists. Joseph Rossman
Manual of industrial chemistry, ed. by Allen Rogers
Manual of instrumentation. M. F. Behar
Metals, their alloys, amalgams and compounds. A. F. Collins
Modern soap and detergent industry. Geoffrey Martin
Motor benzole. Hoffer & Claxton
Principles of patent law for the chemical and metallurgical industries. A. W. Deller
Proceedings of third international conference on bituminous coal
Refractories. F. H. Norton
Regeneration, rekuperatoren, winderhitzer. Werner Heiligenstadt
Rostschutz-rostschutzanstrich. Sulda & Salvaterra
Science in action. Weidlein & Hamor
Silver anniversary of chemical engineering in America
Stainless iron steel. J. H. G. Monypenny
Technische elektrochemie. Jean Billiter
Ten-year index of transactions of Electrochemical Society
Textbook of metallurgical problems. Allison Butts
Textbook of practical physical chemistry. Fajans & Wust
Transactions of the American Institute of Chemical Engineers
Vegetable fats and oils. G. S. Jamieson
Borax capacity up
Brazing alloy (E. N.)
Brewing—Herald the return of a friend of the family (ed.)
Brewing equipment
Brick, mullite (E. N.)
Brickwork, reinforced
Bromine plant of glass resists corrosion
Bronze resists fatigue and corrosion
Brucite sweetening for Oklahoma distillates. F. T. Gardner
Business—Long pull ahead (ed.)

NOTES—(c) Comment; (ed) Editorial; (E. N.) Equipment News; *illustrated; (P. N.) Plant Notebook; (S) Synopsis or abstract.

Carbon:			
Activated carbon absorbers to recover solvent in cellulose acetate process. Avery & Kress	273		
Carbon black production in the Monroe gas field	380		
Coke base carbon (table)	653		
Printing ink production	449		
Used in chemical equipment	518		
Carbon Dioxide:			
Blasting without explosives. F. H. Kneeland	433		
Blowing CO ₂ gas through bath of sodium phenolate or sodium cresolate. Bernard Kramer	262		
Fire safeguarding with carbon dioxide. Casein as a basis for a plastics industry. Kurt Haupt	319		
Castings, corrosion resisting (E. N.)	290		
Cathode-ray tube in x-ray and analysis. Cellulose, properties of (table)	656		
Cellulose board treated	601		
Cement:			
Acid proof cement (E. N.)	166		
Acid resistant cements (tables)	658		
Portland cement (table)	653		
Types, uses and testing of refractory cements. W. R. Kerr	331		
Cement burning	222		
Chain, improved roller (E. N.)	103		
Chemical Engineering:			
But is it true economy? (ed.)	124		
Chemical plant design. Roland Woodward	552		
Educating chemical engineers in the Southwest. O. M. Smith	371		
Engineering observations in the U.S.S.R. J. M. Carmody	71		
Inner viewpoint on a national industrial experiment	73		
Jobs for recent graduates. R. E. Bowman (e.)	567		
Materials for chemical plant construction. Calcott & Olive	476		
Silver anniversary of Chemical Engineering (ed.)	644		
Chemical Exposition—why exhibit? (ed.)	420		
Chemical Industry:			
Ballyhooing science for popular consumption (ed.)	420		
Chemicals and other materials consumed in process industries (charts)	6		
Chemical values resist declines (ed.)	59		
Diversified heavy chemicals industry in Holland	126		
Economic problems at meeting of Manufacturing Chemists' Assn.	338		
Income returns give industries high rating (table)	175		
More reason—fewer rackets (ed.)	247		
National spokesman for all chemical industries (ed.)	308		
Progress in the U.S.S.R. Alcan Hirsch. Struggle overseas (ed.)	249		
Supreme Court for medical fact-finding (ed.)	248		
Vast resources in Southwest await development. W. M. Weigel	366		
What of this index of prosperity? (ed.)	589		
Works of comfort but also of caution (ed.)	420		
Chemicals:			
How chemicals compare with other commodities (charts)	4		
Making products people really need (ed.)	309		
Production and distribution costs of typical chemicals (charts)	2		
Chlorine:			
Bleaching powder made by a new process. Cartuzzi & Paoloni	140		
Chemical methods for treating sewage. Chrome nickel alloy	515		
Clutch:			
Automatic starting (E. N.)	289		
Magnetic disk (E. N.)	165		
Magnetic friction (E. N.)	289		
Coal:			
Comparative values of heat in coal, oil and gas. S. H. Viall (charts)	234		
Process industries consumption of coal and gas (chart)	190		
Resources of coal and lignite in Southwest. W. M. Weigel	369		
Coal products at 1905 level	47		
Coal tar production of intermediates in 1930	47		
Coating, protective (E. N.)	166		
Coke and Coking:			
Coal products at 1905 level	47		
Coal tar distillation by hot gas at the coke oven plant. G. E. McCloskey. Combustion equipment (S.)	333		
Compounds that change color on heating. Herbert Chase (P. N.)	345		
Compressed Gas Mfrs. Assn.—Air filtration methods discussed	149		
Transportation features meeting	75		
Condensing and cooling unit (E. N.)	571		
Containers:			
Containers for every need. M. F. Crass	26		
Containers and shipping instructions for fifty typical chemicals (table)	24		
Course of development. W. N. Watson	23		
Package vs. bulk shipments. R. C. Pierce	29		
Shipping in steel. T. P. Callahan	27		
Control:			
Electron tubes control processes. W. R. King	321		
When electrical heating pays. J. A. Lee	223		
Controller:			
Automatic temperature (S.)	160		
Combustion (E. N.)	287		
Feedwater (E. N.)	103		
Liquid flow (S.)	160		
Liquid level (E. N.)	165		
Motor-operated (E. N.)	163		
Pressure (E. N.)	104		
Process cycle (E. N.)	349		
Recording pressure (E. N.)	348		
Steam-operated (E. N.)	625		
Temperature controller uses photoelectric cell. Newton & Furnas (P. N.)	455		
Time (E. N.)	104		
Conveyors:			
Car-loading (E. N.)	288		
"En masse" conveyor (E. N.)	571		
Redler conveyor (E. N.)	682		
Steel apron (E. N.)	458		
Cork board (E. N.)	167		
Cork insulation for houses	520		
Corrosion:			
Anode coatings protect	519		
Asbestos cement piping	517		
Bromine plant of glass resists corrosion	517		
Bronze to resist corrosion	519		
"Cannonball" corrosion	516		
Chem. & Met. data sheets for corrosion, heat and abrasion resistant metals and alloys	504, 567		
Chemical reactions resisted by glass-lined equipment	518		
Chemical resistance of modern materials (tables)	651		
Corrosion resistant steels	513		
Dye industry searches for cheaper plant materials. Hugh Miller	486		
Eliminating guesswork in materials of construction. Hugh Miller	646		
Guarding against corrosion in acetic acid equipment. D. F. Othmer	136		
How to choose corrosion-resisting metals. Calcott & Olive	476		
Hydrochloric acid gas corrosion. S. L. Tyler	488		
Illium resists corrosion	516		
Intergranular corrosion	129		
Intergranular corrosion of steel	521		
Iron oxide and sand coat protect iron. Material made with metallic adhesive for resisting corrosion. A. W. Coffman	144		
Materials recommended by manufacturers for use with corrosive chemicals	497		
Metals that resist alkali corrosion. J. L. Everhart	88		
Nitric acid production. Thomas McKnight	490		
Operating cost of corrosion. C. L. Mantell	479		
Petroleum pays toll to corrosion. Stanley Gill	481		
Phosphoric acid imposes severe corrosive burden. W. C. Weber	542		
Protective compounds for idle equipment (P. N.) E. R. Woodward	568		
Pulp and paper fight against corrosion. J. D. Miller	484		
Rubber compounds applied to equipment construction. Fritz & Hoover	263		
Rubber for corrosion resistance (S.)	99		
Stainless alloys in chemical construction. Wright & Luger	494		
Sulphuric acid plants. J. J. Healy, Jr.	492		
Synthetic drying oil resistant to oils, solvents, etc.	517		
Thiokol resists corrosion	318		
Unsuspected contamination accelerated tank corrosion	514		
Weld decay, creep and erosion in metals studied	521		
Costs:			
Analyzing distribution costs. D. A. Wilcox	15		
Cutting costs of chemical sales. W. M. Rand	13		
Operating cost of corrosion. C. L. Mantell	479		
Questions for the accounting department (ed.)	531		
Couplings, pyrex tube (E. N.)	288		
Cracking natural gas for carbon black	381		
Cracking petroleum in the Southwest. S. D. Kirkpatrick	374		
Crusher, gyro-centric (E. N.)	288		
Crystallization:			
Rotary crystallizer (E. N.)	627		
Supersaturation control attains close crystal sizing. Jeremiassen & Svaneoe	594		
Crystallizers, continuous, vacuum cooling applied to. H. B. Caldwell	133		
Decaling copper surfaces. A. P. Harrison (P. N.)	455		
Diffuser, continuous (S.)	159		
Diphenyl-type compounds for high temperature heating. J. J. Grebe	213		
Distillation:			
Brucite sweetening for Oklahoma distillates. F. T. Gardner	378		
Coal tar distillation by hot gas at the coke oven plant. G. E. McCloskey. Equipment for distillation (S.)	333		
Hardwood distillation. R. S. McBride. Marketing and industrial uses of charcoal. R. S. McBride	534, 604		
Wood distillation in England. Maurice Schofield	604		
Wood distillation plant. T. C. Albin	265		
Distribution:			
Analyzing distribution costs. D. A. Wilcox	15		
Channels for products of process industries (chart)	113		
Engineer looks at distribution. T. M. McNiece	9		
Profits vs. distribution. O. Fred Rost	37		
Selling chemicals over the counter. G. A. Prochazka, Jr.	25		
What the new U. S. Census of Distribution shows for the principal process industries (table)	8		
Distribution and annual review number, January Distribution and production costs of typical chemicals (chart)	2		
Drives:			
Combining group and unit drives. V. A. Hanson	612		
Drum, lead-coated (E. N.)	348		
Drying:			
Air conditioning and drying (S.)	283		
Air conditioning and drying in cable manufacturing. Wells & Wade	146		
Avoiding confused dryer terminology (ed.)	533		
Dryer for granular materials (E. N.)	346		
Factors that influence dryer performance. Arnold Weisselberg (Mollier chart)	426		
High capacity dryer (E. N.)	625		
Sulphate pulp industry in Sweden. G. Hall	250		
Dust and Fume Handling:			
Dust precipitator (E. N.)	570		
Performance characteristics of cyclone dust collectors. L. C. Whitton, Jr.	150		
Dyes:			
Dye industry searches for cheaper plant materials. Hugh Miller	486		
Printing ink production	449		
E			
Economic influences on chemicals. 114, 176, 243, 300, 356, 412, 468, 580, 636			
Economics:			
Losing tactics for depression fighters (ed.)	588		
Reconstruction continues despite political change (ed.)	588		
Editorials:			
Alkali prospects in the Southwest	364		
American Institute of Chemical Engineers	308		
Another opportunity for patriotic service	308		
Avoiding confused dryer terminology	533		
Ballyhooing science for popular consumption	420		
Barter as a last resort	645		
But is it true economy?	124		
Canada may come to a bargaining tariff	645		
Census of manufactures deserves your co-operation	65		
Changing habits in nitrogen usage	431		
Chemical engineering trends in methods of sewage treatment	125		
Chemical industry's struggle overseas	249		
"Chile for the Chileans" has its treat for us (ed.)	309		
Employment for the unemployed	64		
Further change needed in denaturing formulas	124		
"Get ready for prosperity"	532		
Go to the polls on November 8	533		
Hardwood, a raw material for the process industries	532		
Herald the return of a friend of the family	589		
Industry must improve its administration	364		
Is it another Muscle Shoals?	124		
Learn the law before you act	588		
Long pull ahead	307		
Losing tactics for depression fighters	588		
Louisiana's Institute of Industrial Research	365		
Making products people really need	309		

NOTES—(c) Comment; (ed) Editorial; (E. N.) Equipment News; *Illustrated; (P. N.) Plant Notebook; (S) Synopsis or abstract.

Mathews honors Richards' memory.....	249	Fire extinguisher.....	160	Steam trap, inverted bucket.....	627
Modernizing chemical man power.....	587	Fittings, short radius.....	104	Stoneware, chemical.....	164
Modernizing with modern materials.....	475	Flame arrester.....	288	Switch, vacuum toggle.....	290
More reason—fewer rockets.....	247	Fluometer, electric.....	102	Tank car for bulk solids.....	286
National spokesman for all chemical industries.....	308	Furnace, gas fired.....	347	Thickener, filter type.....	347
New York appeals to the chemical profession.....	248	Fuse, boric acid.....	445	Filter, carboy.....	164
No chemical show until December, '33.....	532	Gage, all steel.....	106	Filter, safety carboy.....	164
Opportunities in the Southwest.....	363	Gage, eye-line level.....	106	Tomcan, tin plated.....	204
Patent law recommendations requested by Congress.....	64	Gage, liquid-level.....	347	Transmission, variable speed.....	167
Patent problems in chemical engineering.....	644	Gage, vaporproof.....	288	Truck, fork lift.....	165
Planning more jobs for more people.....	419	Gate, apron type.....	103	Truck, midge electric.....	167
Proper packaging offers a better remedy.....	125	Gear unit, high speed.....	103	Tubing, flexible metallic.....	286
Questions for the accounting department.....	531	Generator, electric steam.....	571	Valve, diaphragm.....	165
Reconstruction continues despite political change.....	588	Glass lined equipment.....	165	Valve, glass-lined.....	684
Rest from fruitful labors.....	65	Glass-lined equipment resists chemical reactions.....	518	Valve, lubricated gate.....	102
Silver anniversary of Chemical Engineering.....	244	Heater, disk fan.....	102	Valve, thermostatic radiator.....	287
Supreme court for milder fact finding.....	646	Heater, gas-fired immersion.....	627	Valve, thru-port.....	628
That research budget.....	643	Heater, goose-neck immersion.....	458	Valve, thru-ported.....	166
Time to revive the trade acceptance.....	364	Heater, storage tank.....	626	Valves, steam-jacketed.....	164
Watch your power pennies.....	533	Hose, oil-proof.....	684	Vibration isolant.....	289
Westward trend in fertilizer consumption.....	365	Hose, seamless aluminum.....	685	Washing machine, solvent.....	289

NOTES—(c) Comment; (ed) Editorial; (E. N.) Equipment News; *Illustrated; (P. N.) Plant Notebook; (S) Synopsis or abstract.

Gas:

City gas in 1931	47
Comparative values of heat in coal, oil and gas. S. H. Viall (charts)	234
Compressed Gas Manufacturers' Assn. meeting	*75
Constructing vessel for gas-liquid reaction. Bernard Kramer	*262
Cracking natural gas for carbon black	381
How properties affect handling of liquid petroleum gases. T. W. Legatski	*155
Hydrochloric acid gas production and its corrosion. S. L. Tyler	*488
Industry discusses problems	609
Natural gas resources in Southwest. W. M. Weigel	*368
Nomographs for calculation of air and gas velocity. A. Alison (P. N.)	*623
Oil gas generated by new process	*663
Pipe line problems in the Southwest. Stanley Gill	*399
Purging gas-containing equipment (P. N.)	624
Quantity and value of natural gas consumed in U. S. 1906-1929 (chart)	189
Slide rule simplifies gas calculations. P. F. Marz	556
Use of gaseous fuels in petroleum refineries (chart)	188
Volume and temperature of gas mixtures. Evald Anderson	80
Gate, apron type (E. N.)	*103
Gear unit, high speed (E. N.)	103
Generator, electric steam (E. N.)	*571

Glass:

Breakproof glass	520
Bromine plant of glass resists corrosion	517
Chemical reactions resisted by glass-lined equipment	*518
Distillation tower of glass	*515
Eliminating guesswork in materials of construction. Hugh Miller	*646
Glass and fused silica (table)	651
Glass-lined equipment (E. N.)	165
Heat transfer through industrial glass tubing. Littleton & Bates	*315
Laminated glass production	*266
New type of shatter-proof glass. M. Naphtali	679
Non-shatterable glass (c)	601
Sightseeing at Corning	*310
Glyptal-alkyd resins developed into new forms. J. G. E. Wright	438
Glyptal, plastic	314
Gravity conversion chart. A. K. Doolittle (P. N.)	*285
Grinding mill clogging (S.)	99

H

Hardwood, see Wood "Have":

Heat:

Balancing a process plant's power heat load. W. E. Beach (chart and tables)	202
Circulating hot oil for industrial heating. A. B. McKechnie	*218
Comparative values of heat in coal, oil and gas. S. H. Viall (charts)	234

Southwest a proving ground for petroleum technology. S. D. Kirkpatrick	374
Synthetic drying oil resistant to oils, solvents, etc.	517
Trends in fuel production from petroleum, 1899-1930 (chart)	185
Phenolic properties of (table)	653
Phosphates—Phosphate rock mills employ rubber linings	514
Phosphoric acid—Making strong phosphoric acid at Traj. B. C. W. C. Weber	650
Materials of construction for plants. W. C. Weber	542
Photoelectric cell in temperature controller. Newton & Furnas (P. N.)	455
Photoelectric relay (E. N.)	571
Photoelectric relay controls processes. W. R. King	321
Pine gum shipped in tank cars. A. R. Hitch	83

Pipe:

Asbestos cement piping	517
Cast iron joint (E. N.)	165
Choosing pipe line sizes. M. Funder	602
Demountable return bends (E. N.)	450
Determining friction losses in piping systems. Reed & Morrison (charts)	446
Determining pressure drop and heat transfer in. R. A. Bayard	130
Friction factor for round pipes	314
Gas industry discusses problems	609
Hard copper pipe to convey paper stock	515
Heat loss in buried pipe (S.)	150
Hydraulic head in the solution of pumping problems. Reed & Morrison	560
Installation of plant piping. P. D. Hartford	254
Pipe line problems in the Southwest. Stanley Gill	390
Supporting piping in concrete trenches. Bernard Kramer (P. N.)	456
Pipe standards (E. N.)	288

Plant:

Chemical plant design. Roland Woodward	552
Diversified heavy chemicals industry in Holland. E. Borelli	126
Ground plan and elevation of two sulphuric acid plants	69
Materials for chemical plant construction. Calcott & Olive	476
Sources of information of plant location. H. R. Parker	142

Plant Notebook:

Air lift nomograph. D. S. Davis	101
Calculating washing efficiency in counter-current decantation. M. T. Sanders	161
Comparison of A.S.M.E. fusion-welding requirements for unfired pressure vessels	568
Descaling copper surface. A. P. Harrison	455
Factors governing life of conveyor belts. C. F. Conner	162
Freezing points of ternary alcohol mixtures. D. S. Davis	345
Gravity conversion chart. A. K. Doolittle	285
Nomographs for the calculation of air and gas velocity. A. Allison	623
Protective compounds for idle equipment. E. R. Woodward	568
Purging gas-containing equipment	624
Simple method of measuring three phase power. White & Winkler	285
Supporting piping in concrete trenches. Bernard Kramer	456
Temperature controller uses photoelectric cell. Newton & Furnas	455
Temperature sensitive compounds. Herbert Chase	345
Wood-block floors	101

Plastics:

Alkyd resins developed into new forms. J. G. E. Wright	438
Casein as a basis for a plastics industry. Kurt Haupt	319
Phenolic plastics	522
Plastic glyptal	314
Plastic products and producers (table)	523
Resist general trend	448
Uses of phenolic laminated and plastic molded products. H. M. Richardson	597
Plating—trichlorethylene used	261
Plating nickel on aluminum	278
Plug cock, lubricated (E. N.)	104
Ply-metals	518

Power:

Balancing a process plant's power-heat load. W. E. Beach (chart and tables)	202
Columbia River Basin power and irrigation project (ed.)	124
Combining group and unit drives. V. A. Hanson	612
Economies result from improved load regulation. J. V. Alfriend, Jr.	209
Generating and utilizing power in industry. W. S. Johnston	195
Generation vs. purchase of process power. R. V. Kleinschmidt	200
How the power factor may be improved. R. H. Rogers	206
How your power costs may be reduced. B. R. Connell	89
Let's consider steam. T. R. Olive (charts)	192
Measuring three phase power. White & Winkler (P. N.)	285
Power show report	680
Watch your power pennies (ed.)	533
What's in the industrial power plant and why	235
Where the binary cycle stands today. P. W. Swain	204

Pressure:

Determining pressure drop and heat transfer in pipes. R. A. Bayard	130
Facilitating higher vacuums in industrial processes. D. H. Jackson	549
Frictional pressure drop in rubber-lined hose	132
Industrial plants built in 1927-1930 generating by product energy and high pressure steam	106

Prices:

Chemical values resist declines	59
Chem. & Met. weighted index of prices. 59, 117, 179, 243, 303, 359, 415, 471, 527, 583, 639	
Current prices in the New York market. 60, 118, 180, 244, 304, 360, 416, 472, 528, 584, 640	

Primer, suction line (E. N.)	163
Printing ink production	440
Process industries, chemicals and other materials consumed in (charts)	6
Production—Chem. & Met. indexes of production	58, 301, 530
Production and distribution costs of typical chemicals (chart)	280
Proportioner, automatic (E. N.)	569
Proportioning equipment (E. N.)	569

Pulp and Paper:

Corrosion in pulp and paper industry. J. D. Miller	484
Engineers discuss materials of construction	153
Genesia prepares for a native white paper industry	435
Institute of paper chemistry	336
Subphate pulp industry founded on Sweden's resources. G. Hall	250
Pulverizer, table roller (E. N.)	103
Pump runners, enameled (E. N.)	683

Pumps:

Acid pump (E. N.)	458
Acid-resisting (E. N.)	280
General service (E. N.)	683
Hydraulic head in the solution of pumping problems. Reed & Morrison	560
Improved solids pump (E. N.)	457
Nitralloy rotary (E. N.)	164
Non-clogging (E. N.)	683
Oil pumping well	481
Positive rotary (E. N.)	682
Priming unit (E. N.)	571
Propeller pump (E. N.)	570
Pumping liquids (S.)	159
Safety in chemical pumps	619
Self-priming (E. N.)	166
Vacuum pump and compressor (E. N.)	569
Volatile-liquid (E. N.)	458
Purging machine (E. N.)	623
Pyrometer, portable recording (E. N.)	290

Water softener, automatic (E. N.)	*683
Water and steam for process heating. R. J. Gordon	212
Weigher, automatic batch (E. N.)	*672
Weighted per cent equation. H. G. Nevitt ..	*673
Welding:	
Aluminum electrode (E. N.)	348
Chrome alloy flux (E. N.)	349
Comparison of A.S.M.E. fusion welding requirements for unfired pressure vessels (P. N.)	568
Convention in New York	279
Electrically welded steel tanks for gasoline	519
Weld decay in metals studied	*521
Weld fittings (E. N.)	571
Welder, high capacity (E. N.)	684
Welding convention	564
Welding junctions (E. N.)	*104
White pigments	51
Wood:	
Distillation in England. Maurice Schofield	265
Distillation plant. T. C. Albin	*382
Eliminating guesswork in materials of construction. Hugh Miller	*646
Hardwood (ed.)	532
Hardwood distillation. R. S. McBride ..	*534, *604
Marketing and industrial uses of charcoal. R. S. McBride	*664
Metallization of wood. M. Naphtali ..	*269
Physical properties of woods (table) ..	651

AUTHORS' INDEX

ALBIN, T. C. Wood chemical plant meets competition of synthetics	*382
Alfriend, J. V. 1931 electrical trends....	102
Economics result from improved load regulation	*209
Alison, A. Nomographs for the calculations of air and gas velocity (P. N.)	*623
Anderson, Evald. Volume and temperature of gas mixtures	80
Armsby, Sidney P. Lime contributes to Southwestern development	*396
Avery, C. R., and H. Kress. Recovering volatile solvent in a cellulose acetate process	*273
BARKER, PIERCE. Blue vitriol produced by leaching shot	*258
Bates, H. C., and J. T. Littleton, Jr. Heat transfer through industrial glass tubing	*315
Bayard, R. A. Determining pressure drop and heat transfer in pipes	130

Beach, William E. Balancing a process plant's power heat load (chart and tables)	202
Bhagwat, M. R. Unemployment problems in New York area	611
Borelli, E. Diversified heavy chemicals industry in Holland	*126
CALCOTT, W. S., and T. R. Olive. Choosing and using materials for chemical plant construction....	476
Caldwell, H. B. Application of vacuum cooling to continuous crystallizers.*133	
Callahan, T. P. Reducing hazards in acid drum use	152
Shipping in steel	27
Carmody, John M. Engineering observations in the U.S.S.R.	*71
Carughi, Achille, and Carlo Paoloni. Bleaching powder made by a new process	*140
Caswell, R. G. Merchandising and research	33
Volume vs. selective merchandising..	16
